

Questions Received Regarding the Request for Qualifications (RFQ) titled “Environmental Engineering and Site Assessment Services (Issue Date: May 13, 2022).

The City of Marion Public Works Department received the following two questions regarding the RFQ. As specified in the RFQ, answers to both questions are posted below.

Q: Can the City provide a copy of the Operation and Maintenance Plan (approved under Permit WQ0003698) describing the current well sampling frequency and analytical parameters?

A: The current well sampling frequency and analytical parameters are described in Attachment C of Permit WQ0003698. A copy of the permit and its attachments can be provided upon request. The Operation and Maintenance (O&M) Plan, approved under Permit WQ0003698, contains information on the operational functions, maintenance schedules, safety measures, inspection plan, surface runoff prevention, vegetative cover requirement, and reporting requirements. A copy of the O&M Plan can be provided upon request as well.

Q: The RFQ states the previously unknown SDU was discovered during construction activities. Can the City provide information about that construction plan? What is or was being built? Is it complete and/or occupied? What was the extent and depth of disturbance associated with construction?

A: A road was being built on the property. The previously unknown SDU was discovered during clearing and grading operations. Once the SDU was discovered, construction of the road was terminated. The extent and depth of disturbance associated with construction was approximately 4' wide x 6' long x 2' deep.
